

TECHNICAL DATASHEET FOR TRANSPARENCY PACKAGING

GENERAL CHARACTERISTICS

The transparencies are separated from each other with an interlayer and vertically packed in a wooden box
 In order to avoid any movement in the packaging, the transparencies are wedged
 The wedging is adapted to bended transparencies to keep their form
 The box is nailed and strapped with metal band for transport
 The box could be handled with a fork-lift track

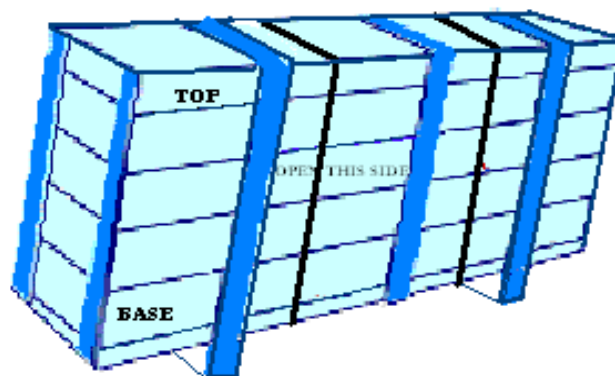

MARKING AND INFORMATION

Each box contains a French and English marking on the opening side

On each box are noted the product's name, the quantity in the box, the weight of the box and «Verre Fragile» (Brittle Glass)

In addition, a label including the address of SAINT GOBAIN SULLY, the quantity of package and the date of the delivery note, is fastened on each box

EXAMPLE OF « EXPORT » BOX

This data sheet and information is the proprietary of SAINT GOBAIN SULLY.
 Transmittal reproduction, dissemination and/or editing without authorization is prohibited
